1 What is SynergyTrading?

SynergyTrading is a brand new infrastructure provided by Fipertec that uses the latest technology in network communications to create synergies amongst individual traders. SynergyTrading is seamlessly integrated into NanoTrader and thus provides a unique experience in joining forces and expertise with like-minded other traders without the hassle of reverting to non-integrated applications, such as Skype or screen sharing programs.

In essence SynergyTrading enables users to publish orders, positions, accounts, structured ratings, and chat messages to other users which belong to the same group. This basic information is enriched and presented directly in NanoTrader by so-called *apps*. Each app is specialized for a specific purpose. The premier app, described in detail in this document, is called *Group Trading*. It focuses on supporting a "group of equals" in their individual trading activities. Other apps to be released in the near future include:

• GuruTrading

A group leader publishes his orders, trades and comments to the group. Trades can be shown easily in a chart of the member. Members can follow orders of the Guru manually or automatically.

• Coaching

A coach sees all order activities of his students and can monitor their accounts.

• LiveSignals

A provider scans various symbols for new signals and broadcasts them instantly.

• TradingMatch

This exciting app allows traders or groups of traders to compete against each other. Join predefined matches or setup your own rules and invite others. A TradingMatch can last only some hours or even days.

2 Getting Started

2.1 Create a trader profile

To use Group Trading you need a trader profile and a monthly subscription of the Nano trading platform. Then you can join existing groups and start your own group. From the main menu choose Portal | Group Trading:

0	Group Trading	_ 🗆 X
← ⇒ 😒 🕃		
	S PLATFORM SCREENSHOTS SIGN IN FORUM FAQ	DE - EN - FR - IT - NL 🔨
Group trading is about traders trading together in real-time trading groups . Trading in groups can be done in different ways and offers many advantages. 	Register

When you are opening the Group Trading website from inside Nano the next time you are aumatically logged into your trader profile.

2.2 Joining a group

SynergyTrading is organized around *groups* and *apps*. A group is a collection of users administered by your broker or by specifically permissioned members of that group. A group uses at least one app for its activities. Once a group is established the required apps are started on a server of your broker. Each group occupies a so-called *room* in a given app to separate it from other groups using the same app.

On the Group Trading website you can browse through the collection of existing groups. By clicking on the image or the name of a group you can open a page showing detailed information. When you decided to join the group click on Join the group.

GROUP "ForexTrading"	
Logo of the group	
Group administrator	
The group is	Public
Maximum number of members	10
Number of members	0
Language(s) in the group	German
Minimum experience required	Beginner
Time(s) when group meets	Every day 08:00-21:59
Products the group trades	CFD Futures
Instruments the group trades	Indices: DAX, CAC, DOW, AEX, etc.
Trading time frame(s)	5 minutes
	We risk everything. All in is our style. If we are not winning, we are loosing. Cool!
What this group offers	
Monthly subscription	Free
Manage your membership	
Join the group	Back

Then the administrator of the group receives a notification about your request. After he processed your request you will be notified about his decision. When he accepted you as a member you can press F5 to refresh the list of apps and rooms that are accessible for you.

The WorkspaceBar shows the apps and rooms that are accessible for you:

In the above example the user is member of the group "ForexTrading" providing a room in the Group Trading App.

To enter a room double click its name.

3 Group Trading

3.1 Entering a Group Trading Room

When doubleclicking a room of the Group Trading App in the WorkspaceBar the Group Trading Bar will appear:

The connection status of the room is displayed in the Group Trading Bar and in the WorkspaceBar:

Initially you are not connected to the room. Group Trading is about publishing your account and you might want to prepare the account somehow prior to show it to your group.

To connect, click the red connection status indicator. The Select Accounts dialog will appear showing your currently opened accounts:

Select accounts	x
Accounts to publish into 'Group Trading' room 'DAX-Club'	
⊡··Nano-VirtualBrokerage	
⊡- WHS	
OK Abbrechen	

In order to connect to the Group Trading App you are required to publish at least one account. You are free though to publish multiple accounts. Depending on the settings of your group you might only be allowed to publish live accounts, i.e., no PaperTrade accounts or accounts being connected to a test environment.

The Select Accounts dialog shows only accounts that have previously been opened.

It is possible to publish the same account into multiple Group Trading rooms.

Checkmark the account(s) to be published and click OK. The app will connect and display its new connection status:

WorkspaceBar P	ST 'DAX-Club' - Group T				
🕀 🔄 Help Center	Subscribable Acco	unts (1/1)	ccounts	Position	s EntryOrders
🗄 🔄 Accounts	10	Symbol ^	Pos	Price	Stop Targe

	🔺 Long	Germany 30 cash	1	9581.30	9537.5 (+17)
🖻 📇 Group Trading	- Bracket Seil Limit	Germany 30 cash	1	9625.8	
DAX-Club	- Bracket Sell Stop	Germany 30 cash	1	9537.5	

The AppBars are saved and restored by NanoTrader's PageManager. Note that if you load a page that does not contain a currently opened AppBar then this AppBar is hidden but it is still connected. Hence, you will still receive all updates of the corresponding app and will still publish your activities. Check the connection indication in the WorkspaceBar if you are unsure about the current connection status.

At any time you can change the selection of published accounts by clicking the Publish button:

'D.	AX-Club' - Group Trac	ding												
	Subscribable Accounts (1/1)			counts	Positior	ns EntryOr	EntryOrders		Chat		5	Publish	Columns	Options

c										
Bal.: EUR	20	2 4 4 0	07	P/L:	0.00				Prices OTrades	

3.2 Subscribing to Accounts

Group Trading is showing trading activities of group members that they conduct in their published accounts. By default you are automatically subscribed to all published accounts of your group members. You can change your subscriptions by clicking on Subscribable Accounts and checking/unchecking the accounts.

ST 'DAX-Club' - Group Trac	ding					
Subscribable Account	ts (2/2) 🔻	A	counts	Position	ns EntryOr	ders
Erik-Paper (Demo)	~	Pos	Price	Stop	Target
🖃 Trader: Erik-Paper (Demo)					
•	No traded symb	ol				
🖃 Trader: Erik-WHS ([Demo)					
🔺 Long	Germany 30 cas	sh	1	9581.30	9537.5 (+17)	
- Bracket Sell Limit	Germany 30 cas	sh	1	9625.8		
- Bracket Sell Stop	Germany 30 cas	sh	1	9537.5		

The Group Trading App will aggregate certain information of the group members, i.e., how many members are long or short in a given instrument. All group related information is based on your subscribed accounts, not on the totality of the connected members.

You can disable the automatic subscription to accounts in the Options.

3.3 Data Displayed by the Group Trading App

The Group Trading App displays a multitude of information. These are divided into four main categories:

- 1. Customizable tabular data displayed in a report. The report contains three pre-configured selections of the available columns called *views*.
- 2. Chat messages, either general or related to a particular position or order.
- 3. Customizable list of activates of all group members (not just of those accounts you are subscribed to).
- 4. Display of position and order information in a chart.

3.4 Data Views

The Group Trading App offers three predefined selections of columns to be displayed in the report in section 1 as shown above. Each view focuses on a specific informational aspect. The column selection, ordering etc. are fully customizable as described below. The detailed meaning of the displayed data is discussed in a subsequent section.

Accounts View

The "Accounts" view shows a list of all positions, orders and recently traded instruments of the published accounts from the group members you are subscribed to. It is similar to the AccountBar showing a regular trading account, hence the name, but it adds a lot of information. Note that you cannot trade directly from here.

Your own published accounts are always displayed at the top of the "Accounts" view. This allows easy access to various features that are only available to the account's owner. Also you always see exactly how your group members will see your account.

0	AX-Club' - Group Tra	ding

-	Bracket Sell Stop	Germany 30 cash		1	9537.5					50%	1 (50%)	0 (0%)			Λ	* e		8 0	QP (0 🕝

Positions View

The "Positions" view shows only existing positions and omits all orders. However, if a position has bracket orders attached their price levels are also displayed. Using the "Positions" view you get an instant overview about what's going on in your group. Also, various graphical displays show the current status of trades as they relate to their bracket orders. This allows to easily spot interesting trades that you want to hook on to.

ST	ST 'DAX-Club' - Group Trading X																		
C	Subscribable	Accounts (2/2) 🔻	Accou	nts Pos	sitions	EntryO	orders	Cł	at Activit	ies Publish	Colu	mns	Options

	Long	Germany 30 cash	-1.00	44.50	1	1.02			9537.5 (+17)	9625.8	00:10:47	50%	1 (50%)	0 (0%)	$\Delta \star$	0 💎	A 0	C 0	000

EntryOrders View

Often times you watch out for new trading opportunities. The "EntryOrders" view will show you only those orders of your subscribed to group members that are meant to open a new position or to increase an existing position.

If the order has "contingent bracket orders" attached, as possible in CFD/Forex trading, then their prices are also displayed. The combination of entry price and bracket prices gives a good insight into the envisioned trade.

ST '	DAX-Club' - Group Tra	ading														×
0	Subscribable Accour	nts (2/2) 🔻 🗛	coun	ts	Positions	EntryOrders	C	nat Act	ivities	Publish	Columns	Optio	ns			
	Dir.	Symbol	~	Pos	Price	Last	Age	#Longs	#Shorts	Trader		Hints		Likes	Disli	Chat

Customizing the Views

The views are fully customizable so you can arrange everything to your liking.

Use drag and drop in the column heading to reorder the positions of the shown columns.

By clicking on "Columns" you can open the Field Chooser showing a list of available columns currently not used in the selected view.

						_		×
Cha	at Act	ivities Pub	lish C	Columns	Options			
t	P/L	Range	%Group	#Longs	#Shorts	Facts	Hints	
				7			_	
	-17.00		50%	1 (50%)	0 (0%)	Field Chooser	r 😣	Θ (
						Trader	A	
			50%		0 (0%)	Last		0
9625.8	0.50		50%			P/L perMin		9
			50% 50%		0 (0%) 0 (0%)	TicksToGo	E	
			00%	1 (30%)	0 (0 %)	LongEvo		
						#L : #N : #S		
						ShortEvo		
			and the second second			RRR		
						Profit		
						PotProfit		

Drag an item from the "Field Chooser" and drop it onto the view heading at the position you want to insert the new item. If you want to remove a column from the view drag it from the view and drop it onto the "Field Chooser".

Clicking on the title of a column activates ascending sorting of its data. With another click you can switch to descending sort mode. Clicking again will deactivate sorting.

Dir.	Symbol ^
- Account: WHSdem	o4700 Aper (Dem
📥 Long	France 40 cash,
📥 Long 💋	Germany 30 cash
 Short 	Simulation
- Bracket Buy Limit	Simulation
- Bracket Buy Stop	Simulation

It is possible to activate sorting for multiple columns. In this case the sorting is done by each column from the left to the right. Use drag and drop to move a column to the left if you want its sorting to have precedence.

3.5 Chat

Use the Chat button to show or hide the chat pane in the Group Trading Bar.

ST 'E	AX-Club' - Group Tra	ding						
\bigcirc	Subscribable Account	ts (2/2) 🔻 🗛	ccounts	Positio	ns EntryOrde	ers Cl	nat Act	tivities
	Dir.	Symbol ^	Pos	Price	Stop	Targe Ch	at /L	Range
	Trader: Erik-Paper ((Demo)						
	Long	Euro-US Dollar S	1	1.3180		//	-21.00	
	Trader: Erik-WHS (I	Demo)						
	Enter Long Stop	Euro-US Dollar S	100000	1.31880				
	Long	Germany 30 cash	1	9581.30	9540.1 (+29)	9625.8	-0.20	
-	Bracket Sell Limit	Germany 30 cash	1	9625.8				
-	Bracket Sell Stop	Germany 30 cash	1	9540.1				

The chat can be used for a normal chat amongst the group members. Moreover it allows to discuss specifically a position or and order.

Chat with all Group Members

To view the general chat messages click the Show all button in the chat pane. This will clear a potential filter:

Filter:	A -194411 1 1 1	Show all
Filter: 19:55:59 s	t 1344 Had a good day.	Show all
19:56:53 s 19:57:23 s 19:57:43 s 19:58:01 s	t 1253 Yep, same for me. t 1252 Curious abot the Dax tomorrow. t 1344 Not sure - assume a boring sideway day. t 1253 2 Right. t 1252 Let's see.	
	t 1344 Maybe we should start only a 16:00 tomorrow. t 1252 Sound good to me.	
		~
<		 >
Yes. See y	rou tomoroow at 16:00 🤥	\$ Icons Send

Enter your message, add icons by entering the usual shortcuts such as :) or ;) or click the lcons button to choose one of the available icons:

	8	۳	🧐
٢	3	<u>ی</u>	
۲	<u></u>	*	

Press Enter or click Send to submit the message. To add a line break into the message use Ctrl+Enter.

Chat on a Position or Order

Often times you want to exchange about a specific position or order. To do so just click the Chat cell of that item in the report:

C	Dir.	Symbol	~	Pos	Price	Stop	Target	P/L	Range	Chat	%Group	#Longs	#Shorts	PotProfit	Facts	
- A	ccount: WHSdemo	4700-Paper (De	mo)												
۵ 🔺	ong	Simulation		1	5865.00	5709.5	5916.5	325.00		🗩 09:18:02 joachim	100%	1 (100%)	0 (0%)	962.50	•	00
- B	Bracket Sell Limit	Simulation		1	5916.5						100%	1 (100%)	0 (0%)			
- 4 B	Iracket Sell Stop	Simulation		1	5709.5			10000	1		100%	1 (100%)	0 (0%)			

The chat filter will be set to the clicked item and the chat window will only show messages for that item. In addition to the text messages from users all changes of the position or order will also be displayed automatically by NanoTrader.

The chat about a position of a member stays alive even if the position is closed. This way you have a complete history of actions including all discussions relating to a symbol traded by the group member.

The Chat cell in the report will always show the last received message related to the respective order or position. It will also highlight for a while if it receives a new entry. Hover the mouse over a Chat cell and a condensed list of the messages is pop up:

1	Accounts	Positions	EntryOrders	Chat	Activi	ties	Publis	n Columns	Options
1	Pos	Stop	Target	P/L	Price	Range		Chat

Activities 'D	AX-Club' - 'Gro	oup 1	Frading'		x
Show	Positions	V (Orders Vember in/or	ut	
Drag a col	umn header here	to g	roup by that column.		
Time ~	User		Action	Symbol	Trader
11:14:15	Erik		Entered the room		
11:14:25	Erik		Left the room		
11:17:31	Erik		Entered the room		
11:24:14	Erik		Left the room		
11:24:15	Erik		Entered the room		
11:25:32	Erik		Position opened: 1 of	Euro-US Dollar S	Erik-Paper (Demo)
11:35:41	Erik	۲	Position closed: 1 of	Euro-US Dollar S	Erik-Paper (Demo)
11:35:44	Erik		Position opened: 1 of	Euro-US Dollar S	Erik-Paper (Demo)
11:35:48	Erik	▼	Position reversed. Volume -1	Euro-US Dollar S	Erik-Paper (Demo)
•					>

The ActivitiesBar can be positioned independently of the Group Trading Bar.

Even if you are not subscribed to the accounts of certain members the ActivitiesBar will still display their activities. That way you have a precise overview of what goes on in your group. Moreover, a member's account might become interesting because a new position was entered, so you want to subscribe to that member.

Note that activities are only published if the user is connected, i.e., orders that are executed while not being connected are not reported.

Use the checkboxes at the top to filter certain message types, i.e., you might only be interested in position changes:

Activities 'D	AX-Club' - 'Gro	up 1	Trading'		×
Show	Positions	V (Orders Member in/or	λ.	
Drag a col	umn header here	to g	roup by that column.		
Time - A	User		Action	Symbol	Trader
11:25:32	Erik	-	Position opened: 1 of	Euro-US Dollar S	Erik-Paper (Demo)
11:35:41	Erik	۲	Position closed: 1 of	Euro-US Dollar S	Erik-Paper (Demo)
11:35:44	Erik	۸	Position opened: 1 of	Euro-US Dollar S	Erik-Paper (Demo)
11:35:48	Erik	•	Position reversed. Volume -1	Euro-US Dollar S	Erik-Paper (Demo)
•					>

Also, you can easily apply sorting and multi sorting by clicking the column headers.

To group the entries, e.g., by account, drag the Account header into the grey field just above it:

3.7 Display of Position and Order Information in a Chart

The Group Trading App allows to visualize positions and orders directly in a chart. Also bracket orders are specifically pointed out.

The easiest way to show a specific position or order in a chart is to click on its Chart cell:

	_															>
Accou	ints	Positions	EntryC	orders	Cha	t Activities	Publish	Colur	nns	0	ptions					
Pos	P/L	PotProfit	RRR	Range		Stop	Target	Chart	%G	àroup	#Longs	#Shorts	Hints		Сору	ŀ
-4	14200	5500.00	5.12			5917.0	5681.5 (-119)	~ <u>^</u> 1		50%	0 (0%)	1 (50%)	$\wedge \star$	1 the Manz	C 0	0
										Plain	n		[Ticks	s - Ioads O	days]	
									43	Stud	ies of this	Security			•	•
										Tem	plate Stud	ies			•	•

This will show a menu containing already opened studies for the underlying symbol as well as studies that could be opened. Click on the desired study to open it:

You see the member's short position (red circle) as well as related bracket orders. The bracket orders are connected to the position they are protecting by the dashed lines.

The chart will show all positions and orders of all members you are subscribed to from all Group Trading rooms you are connected to.

To make this info as clear as possible, the display distinguishes between long and short positions and buy and sell orders. Each of them is displayed in its own strip:

Strip 1: buy orders

limit buy = green triangle, stop buy = green triangle

bracket limit buy = light green triangle, bracket stop buy = light red triangle

Strip 2: short positions red circle

Strip 3: sell orders limit sell = red triangle, stop sell = red triangle bracket limit sell = light green triangle, bracket stop sell = light red triangle

Strip 4: long positions green circle

The ordering of the strips ensures that bracket orders are always left of their corresponding positions.

By clicking on one of the shown elements you can highlight all orders and positions from the account the clicked element belongs to. Additionally the period in which the position was opened or modified is highlighted. The period is highlighted in green for long and in red for short positions.

The following screenshot shows a short position and its brackets. The member also placed an additional Limit Buy order to reverse the position.

Moving the mouse above one of the circles or triangles will show detailed information about the order/position including the chat and activity history:

The colors user for drawing can be customized in the ColorManager.

Connecting a Chart to Group Trading rooms

If you want to display Group Trading entries in an already opened chart you can just click the Synergy icon:

2							NanoTrade	er - test - [Simu	lation [3 Min.]	Plain]			- 1
	File	View	Extras	Portal	Help								
	Dpen a	G A Chart	Save A	II Pa		r Tile	\$ TradeWizard	PlayBackWizard	SpeedTrader	TS Time + Sales		? About

To disconnect from Group Trading rooms just click the icon again. Once connected all changes in all subscribed accounts are automatically reflected in the chart.

3.8 Description of available Data Columns

Column Name	Meaning
Account	The account the position or order is belonging to.
Dir	Long/Short for positions. Order type and additional info for orders.
Pos	Position size/Order volume
Symbol	The symbol's name. In case you have no access to the data

	source the symbol belongs to any data related to live prices cannot be shown, e.g., P/L.
Price	Avg. price for positions, trigger price for orders.
Last	The last price of the symbol received from the exchange.
Stop	Positions only. The price of the <i>closest</i> stop order for the position. (Note: most often the time this will be a bracket order, but it could also be any manually placed order.) The cell will be highlighted in case the member changed the Stop price. The last change, expressed in ticks, will be shown in parenthesis after the price. This allows to easily spot changes.
Target	 Positions only. The price of the <i>closest</i> limit order for the position. (Note: most often this will be a bracket order, but it could also be any manually placed order.) The cell will be highlighted in case the member changed the Limit price. The last change, expressed in ticks, will be shown in parenthesis after the price. This allows to easily spot changes.
P/L	The current P/L in the currency of the traded symbol.
	Note that for CFD/Forex trading the P/L is calculated based on the account variant (Micro, Mini, Standard) of your own account and not on that of the person holding the position. This allows to relate the P/L in a given symbol to the amounts you are used to.
P/L perMin	The P/L per minute.
TicksToGo	Distance in ticks to the nearest Stop or Target order. If it falls below a threshold defined in the Options then the cell will be highlighted.
%Group	How many of the subscribed accounts have a position in the symbol? Expressed in percent.
#Longs	How many of the subscribed accounts are long in the symbol?
#Shorts	How many of the subscribed accounts are short in the symbol?
LongEvo ShortEvo	Shows the latest evolution of long and short positions. Typically you place the LongEvo column left of the ShortEvo column, like this:

	LongEvo ShortEvo
	Each circle represents an action. Whenever a position change in the underlying symbol occurs through any of the subscribed accounts a corresponding new icon is added to both cells. The addition is at the right for the LongEvo cell and at the left for the ShortEvo cell. In the example above an account has increased or opened a long position. Hence an upward pointing arrow was added. Also a "no action" icon is added to the ShortEvo cell.
	long position, hence a downward pointing arrow in the LongEvo cell.
	If no action occurs for a certain duration both cells receive a no action item:
	The duration as well as the number of action icons can be defined in the Options.
#L : #N : #S	Ratio of long positions to no position to short positions in the underlying symbol.
Facts	Positions only.
	This cell displays varies facts about the position: ••••••••••••••••••••••••••••••••••••
	Triangles with a plus/minus sign indicate increasing or decreasing of positions, e.g. increasing a long position, or decreasing a short position.
	The first arrow indicates a reversal from a short to a long position; the second arrow a reversal from long to short.
	 ✓ 2 0 1 The numbers from left to right denote: #likers, #dislikers, #exits.
RRR	Risk Reward Ratio. Defined (for long positions) as follows: (Target - EntryPrice) / (EntryPrice - Stop)
Range	The range indicator gives an instant insight into

	the current status of the trade: The black triangle denotes the last traded price. The Target defines the green area. The Stop defines the red area. The white vertical line defines the entry price. Hence, with this single element you see immediately the ratio form target to stop, the potential remaining profit, distance to stop and target, etc. A trade that hast developed very positively and where the Stop has been adjusted, e.g., by a trailing stop, might look like this:
Profit	Shows the current profit in relation to the remaining profit.
PotProfit	Remaining potential profit, i.e., distance to target.
Hints	\bigtriangleup $\stackrel{\bullet}{\longrightarrow}$ $\stackrel{\bullet}{\Longrightarrow}$ The hints can be used by the owner of the position of order to signal certain conditions to his group members. In many cases this much more efficient than writing individual chat messages.
	Click the "Caution" sign to indicate that the trade is experimental and others should not copy it. Choose from the stars menu to rate your own trade. Choose a smiley to signal your mood about your position. Click the parachute to indicate that you will soon close your position or cancel your order.
Likes	Number of users that like the position/order.
Dislikes	Number of users that do not like the position/order.
Exits	Number of users that suggest exiting the position/order.
Chat	Last chat entry. Click to open Chat Pane and add messages.
Chart	Click to open chart and highlight clicked element.
Сору	Open the TradeWizard
Time	Time of creation or last modification. The cell will be highlighted for a while if its content changed.
Age	Duration since creation or the last modification in HH:MM:SS.
Origin	How was the position/order created? Manually, TradeGuard, TacticOrder, etc.

3.9 Setting Various Options

Click on "Options" to open Options dialog of the Group Trading App.

Click OK to save the options for the given room. When clicking Save as Standard the settings of all options as well as the customized column layout of the views are saved as the new standard setting. The standard setting is used when you enter another room of the same app for the first time. Also you can load the standard layout explicitly to revert from your current settings.
